

With our desire to create quality Macedonian products, we ambitiously went in realizing the idea and realization of our ultimate goal. With big effort and hard work, with a team of technologists and planners, we created a modern facility for meat processing and production of meat products. Meat processing industry “SOLETA” - Skopje leaving all prejudices, with organized production at the area of 2400 m<sup>2</sup>, on 19 December 1996, started its work.

Applying modern methods and following the innovations in the meat processing, over the past years, as well as in the future, we permanently invest in modern technology and equipment. Following the European and world trends, as well as demands and expectations of our customers, we created Macedonian products with distinctive taste and superb quality. Best confirmation for our work was the quality sign “With pride from Macedonia”, which two years in a row was awarded to our products for the best taste and best packaging.

Our assortment consists of 70 products, which are continuously expanded with new products, at the same time satisfying the basic product criteria and standards. The entire range of SOLETA's products is HACCP certified with a certificate valid and competitive in the EU countries.

Products of "SOLETA" are represented in our retail facilities (discounts), as in all major and smaller markets on the territory of Macedonia and outside the country. Many years of experience, presence and operation through years of change and transition, amid the uncertain economic environment, were and still are motive and incentive for further achievement and confrontation with the time and challenges!

Recognizable and memorable among customers, many of them will say: "With SOLETA it is impossible to be on a diet", but most of them recognize the "Quality that is not coincidence".
